  @lazybeaglewoodcrafts

Thank you for purchasing from us at Lazy Beagle Woodcrafts. Great care has been taken in providing you an excellently hand-crafted board. We recommend the following steps to maintain and care for your customized board so that it may provide you many years of enjoyment.

Cleaning:

!!!!DO NOT USE A DISHWASHER!!!!

- 1) To clean, use a mild soap, warm water, and a lint free cloth or sponge.
- 2) Scrub the board until free of any remaining food. Be sure to clean both sides.
- 3) Rinse well.
- 4) Wipe off excess water
- 5) Dry so that air can circulate freely around both sides of the board (to reduce warpage)

Sanitizing (deep cleaning):

Bleach – 1 part bleach to 4 parts water.

Or

Vinegar – 1 part white vinegar to 4 parts water.

- 1) Soak board in your choice of cleaner for a few minutes.
- 2) Thoroughly rinse
- 3) Dry so that air can feely circulate around the board.

Maintenance:

Your board is coated in a food grade mineral oil and beeswax mixture to protect it from contaminants, cracking, and warping. You will need to re-apply oil to the board to maintain this protection periodically. Minimum twice a year. Monthly if you use the board daily.

- 1) Ensure the board is completely clean and dry.
- 2) Pour some food grade mineral oil or any commercially available cutting board treatment on the board.
- 3) Wipe/Buff the oil treatment into the board with a clean towel or lent free cloth.
- 4) Be sure to coat both sides and the edges.
- 5) Let sit for minimum of 30 minutes (over night is fine as well)
- 6) Wipe off excess.
